Worldwide trend of no risk non-injection gentle Anti-Aging therapy w/ Hyaluronan

Contraindications:
- a) general: Light dermatosis, pre / post Cytostatica, PreCancerosis, Malignomas, Pacemaker, use of photosensitive drugs, pregnancy
- b) in case of neck Anti-Aging: thyroid mal function

**Preparation of the skin**
- 2-3 days before to drink enough water
- one day before to eat a “salty” consomé (clear saline soup)
- 24hrs prior to the treatment no make-up

**Preparation of the skin**
- intensive skin cleansing by deep facial scrub / peeling (removing of grease, cleaning of the pores)
- prepare warm compresses and put the HA Hyaluronan bottle (vial) into a hot water bath up to 40 - 50°C
- after peeling use of “pre-care” cleanser to remove residuals of particles (i.e. dirt, fat, soap, crème, etc.)

**Apply the warm HA**
- Use the pipette (content 1ml), fill it and apply 1ml for one side of the face…
- …paste the HA onto the skin, rub it in by gentle massage, using “hands-on” and…
